DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Species A: Figs. 1-3, Group I, claims 1-9 in the reply filed on 2/12/2009 is acknowledged. Since, applicant had failed to specifically point out the traversal in the restriction requirement, the election has been treated as an election without traverse.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 10-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/12/2009.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

I- Claim 5 recites the limitation "said hinged connection" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3754

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1,4-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Chalmin et al. 5,673,822.

Chalmin et al. disclose a dropper bottle assembly (col. 1, ll. 66-67 onto col. 2, ll. 1-8), which comprises a dropper bottle (4) including an interior volume, a cradle (10) mounted to the dropper bottle, the cradle including a movable lever arm (3), wherein movement of the lever arm causes a first portion of the lever arm to deform the dropper bottle in reducing the interior volume of the dropper bottle, whereby reduction of the interior volume causes fluid to be administered from the dropper bottle (col. 4, ll. 42-47), the cradle includes a second portion (20) the lever being hingedly (31) connected to the second portion.

Allowable Subject Matter

7. Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hegemann et al. 4,860,738, Watson, Jr. 3,405,843, Chen 6,305,580, Weiss et al. 5,487,489 and Lippman 4,765,515 disclose other types of dropper bottle assembly.
